WARNINGS & PRECAUTIONS:

To avoid risk of serious injury or possible violation of laws, please read the following thoroughly before installation or connecting.

- This product is designed specifically for use with 12 volt, negative ground electrical systems only.
- Having the wiring and installation done by an expert.
Be sure to disconnect the cable from the negative battery terminal while installation.
- This apparatus shall not be exposed to dripping or splashing, and no object filled with liquids shall be placed on the apparatus.
- Fuses shall be replaced only with the correct type and fuse value, and only when the apparatus is powered off.
- To prevent a short circuit, never put or leave any metallic objects(such as coins or metallic tools)inside the unit.
- Never set the volume of this product so high that you cannot hear outside traffic and emergency vehicles.

PRODUCT FEATURES:

1-DIN Car Indash Multimedia Player

Capacitive Touch Screen

USB playback

Bluetooth 5.0

Bluetooth music playback

Remote control operation

CVBS reverse video input

2.1A fast charging

iOS and Android phone connectivity

4x60W maximum power output

Preset 16 EQ,4 sound effects,1 customized Setting

Support Video AVI, MKV, MPG, ASF, FLV, TS

Support Audio MP3, WMA, AAC, WAVE, FLAC, APE

INSTALLATION

Installation Procedures

First complete the electrical connections and then check for correctness.

Installation Opening

This unit can be installed in any dashboard having an opening as shown below:

TO Install The Car Radio

Be sure you test all connections first, and then follow these steps to install this unit.

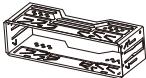

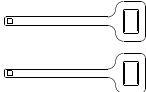

1. Make sure the ignition is turned off, and then disconnect the cable from the vehicle battery' s negative (-) terminal.
2. Disconnect the wire harness and the antenna.
3. Remove the detachable panel and decorative enclosure frame and place on one side.
4. Insert the two brackets into the left and right sides of the chassis, as shown in the following figure, and separate the chassis from the sleeve.

5. Insert the installation sleeve into the center console to be installed, and bend the clip using a screwdriver. Make sure the locking rod is flush with the mounting sleeve and does not protrude.
6. Connect cables as shown in the wiring diagram.
7. Insert the car radio into the mounting sleeve.
8. Install the decorative enclosure frame.

Click on the PhoneLink icon on the main interface to enter the PhoneLink interface

Select iOS/Android based on your phone type. After confirming the phone type, you can choose wired/wireless connection and follow the prompts to complete the connection

TECHNICAL PARAMETERS

Routine

Voltage: 14.4V (10.5-16V)

Working temperature: -10°C – +60°C

Storage temperature: -20°C – +70 °C

TFT Display Options

Display size: 7

Display resolution: 1024x600 IPS

Contrast degree": 500

Radio Options

FM Frequency Modulation

FM Range: 87.5-108.0MHZ

Supporting Video Format

AVI, MKV, MPG, ASF, FLV, TS

Audio format support

MP3, WMA, AAC, WAVE, FLAC, APE

Wireless network

Standard: 802.11 a/b/g/n/ac

Spectral range: 5GHz

USB interface options

USB: Read

Charging

5V \Rightarrow 2.1A

Video options

External Video Input System:

NTSC/PAL/SECAM

External Video Input: 1VP-P/75 Ω

Audio options

Maximum power: 4x60W

Front output(V): 2V/10K Ω

Pre-output impedance: <600 Ω

Speaker impedance: 4-8 Ω

Bluetooth options

Communication system: BT5.0 +EDR

Output: Bluetooth Standard Power

Level 2 Maximum communication

Range: About 5 meters.

Band: 2.4G

COMMON TROUBLESHOOTING GUIDELINES

Fault	Reason	Solution
Unable to boot	Power supply fuse burned out	Replacement of the same type of fuse
	Other factors cause microprocessors to work abnormally	Reboot by pressing the reset hole on the panel with the pointed object point
When the ignition switch is turned off, all the information of setting is lost.	Replacement of batteries or fuses	Reset the information and keep it
The radio is ineffective	Weak radio signal	Re-search by moving the car to another location
	Failure to connect radio antennas leads to weak signals	Connect the antenna and retrieve the station
No image	Other factors cause microprocessors to work abnormally	Reboot by pressing the reset hole on the panel with the point of the pointed object
Silent output	Small voice	Increase the volume required
	Output line incorrectly connected	Check Output Line Connection
